The numbers in the figure above should be considered a guide because of unaccounted-for small-facility coal consumption.

Extent of Pennsylvanian System rocks
Active mines
Mined-out area, surface
Mined-out area, both surface and underground
Mined-out area, underground
Metropolitan area

2 ➤ Coal handling dock (number refers to table below)
3 ⚒ Active coal mine (number refers to table below)
5 Coal-fueled electric power plant (number refers to table below)
7 Major coal-fueled industrial or institutional plant (number refers to table below)

Note: Rivers, roads, and cities are selectively represented for geographic reference.

Generalized stratigraphic section showing approximate vertical relationships of significant coals in Illinois. (Bold type indicates coals currently being mined.)

Preparation of this map was funded in part through a grant by the Illinois Clean Coal Institute

The maps and digital files used for this map were compiled from data obtained from a variety of public and private sources and have varying degrees of completeness and accuracy. They present reasonable interpretations of the geology of the area and are based on available data. Locations of some features may be offset by 500 feet or more because of errors in the original source maps, the compilation process, digitizing, or a combination of these factors. These data are not intended for use in site-specific screening or decision making.

Only coal mines with known areal extent are included on this regional map. Contact the Illinois State Geological Survey or visit our website for larger-scale maps that show the locations of smaller, local mines in selected areas of Illinois. Use of this document does not eliminate the need for detailed studies to fully understand the geology of a specific site. The Illinois State Geological Survey, the University of Illinois, and the Illinois Department of Commerce and Economic Opportunity make no guarantee, expressed or implied, regarding the correctness of the interpretations presented in this data set and accept no liability for the consequences of decisions made by others on the basis of the information presented here.
