

Danville Coal Elevation

The digital files and maps used for this study were compiled from data obtained from a variety of public and private sources and have varying degrees of completeness and accuracy. They present reasonable interpretations of the geology of the area and are based on available data. However, the interpretations are based on data that may vary with respect to accuracy of geographic location, the type and quantity of data available at each location, and the reliability of the data sources. Consequently, the accuracy of features shown in these files varies from place to place.

Illinois State Geological Survey, Coal Section 

SOURCES OF DATA AND LIMITATIONS OF MAPS / SPATIAL COVERAGES

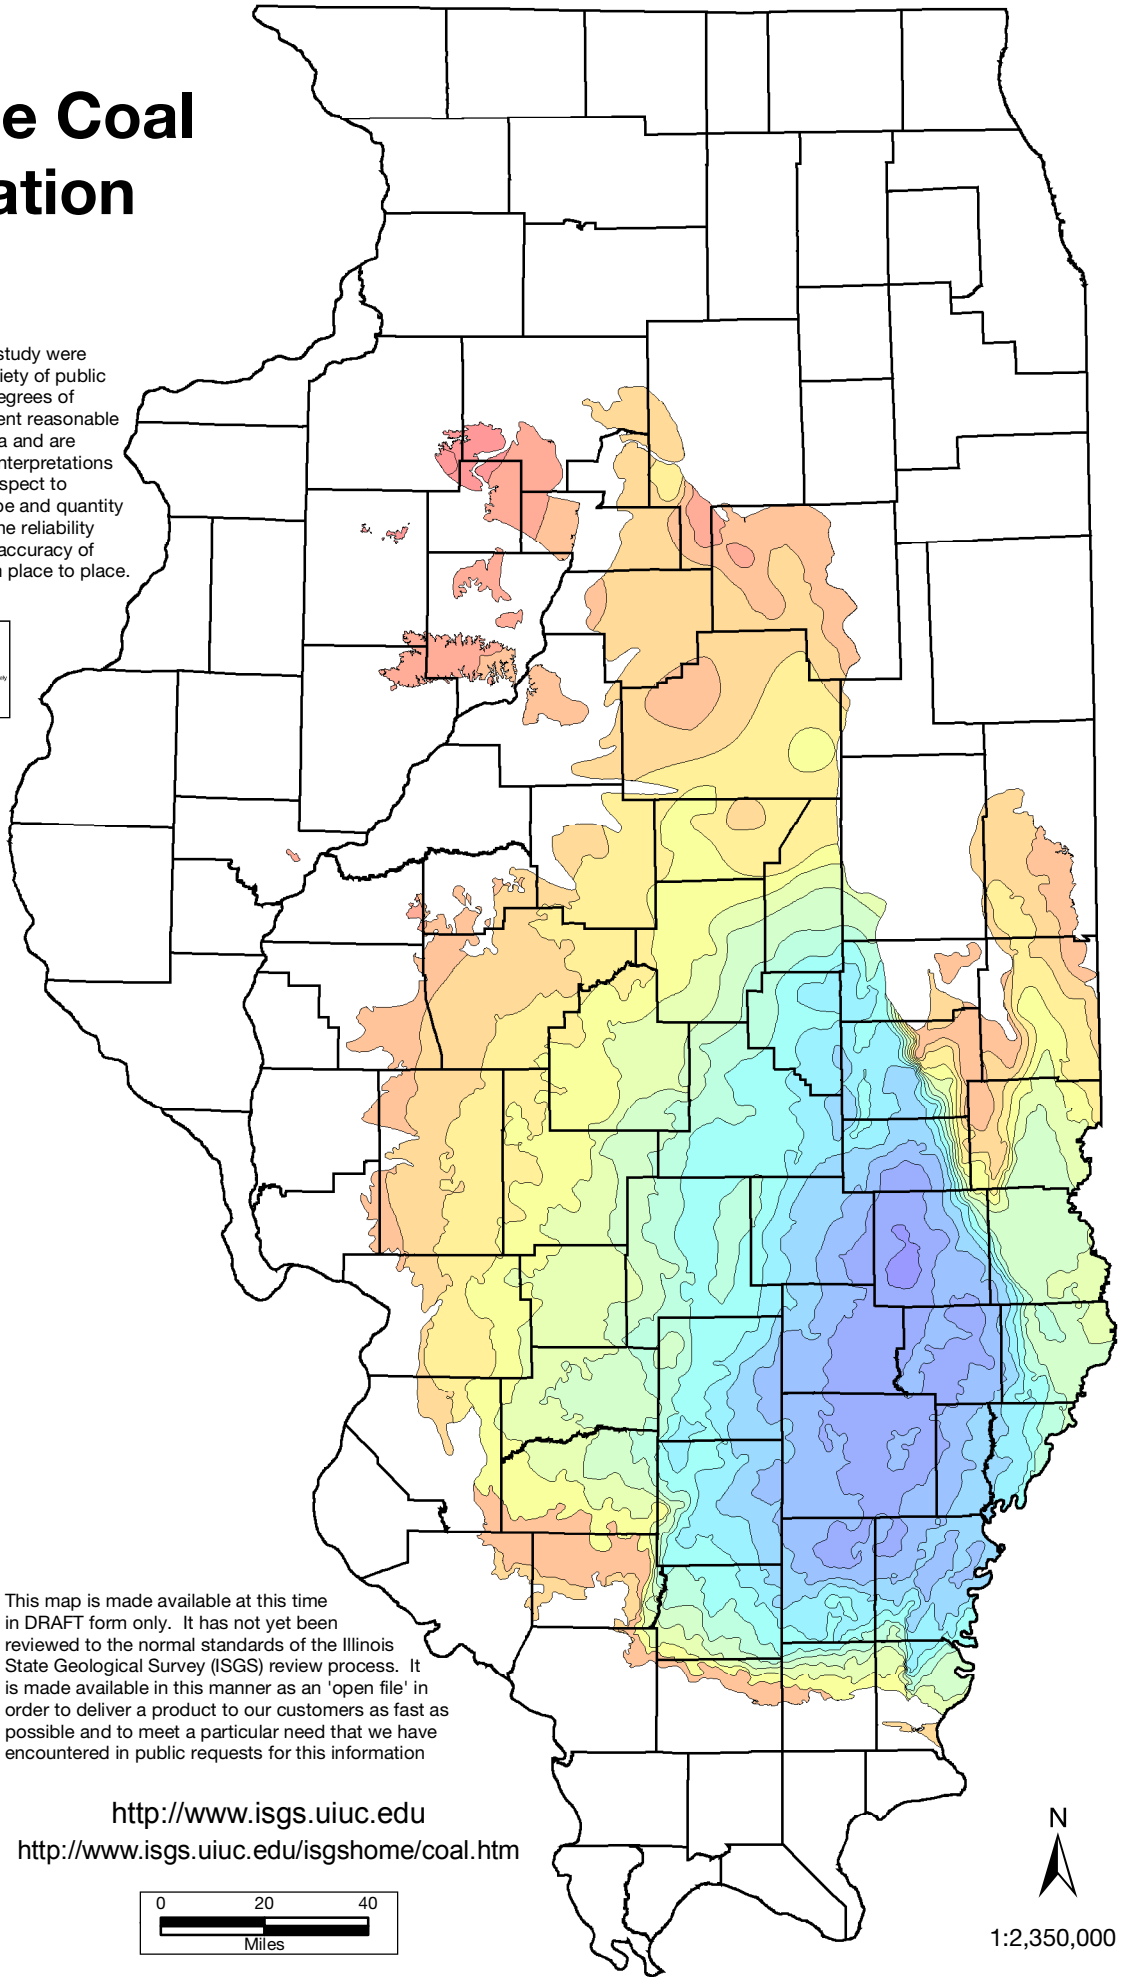

The maps and coverage used for this study were compiled from data obtained from a variety of public and private sources and have varying degrees of completeness and accuracy. The maps are designed for regional assessment and have a resolution of 1:250,000 or greater. Distances or details of features smaller than about one-half mile across may not be accurately portrayed or may be omitted altogether.

This digital data is given as-is, and is not to be stored by the user.

Revisions updated to 1995, major features updated to 1993, minor features updated to January, 1999.
